# Meridian Winds

Quality Repair and Restoration Services for All Band Instruments Since 1984

## Woodwind Instrument Crack Repair

Crack repair remains an inexact science and no repair can be 100% guaranteed to have absolute longevity. Our methods of crack repair have evolved through many years of repair cracks on countless instruments and have a proven history of success.

Our method of refinishing the affected area of the crack is virtually invisible.

Repair crack and refinish affected area: **\$10 per pin** (average crack requires 2-3 pins per inch)

Repair crack through Oboe or English Horn crown: **\$50** (ABS or Blackwood)

*\*\*Any woodwind tone hole with a crack running through it must be replaced/capped with an insert to insure any reasonable expectation of success and/or longevity in repair the crack\*\**

## **Graphite Banding**

We do not recommend any form of metal banding. We will perform graphite banding on any woodwind socket that is cracked, but not yet broken out.

In many situations, a socket replacement is the advisable solution.

We do not advise graphite banding for the repair of upper joint cracks.

Graphite Band: **\$40 each**

---

Special requests for expedited service are honored whenever possible: please contact us before sending the job, and clearly mark "**HOT RUSH**" on the box

**Quoted prices DO NOT include the cost of return shipping or insurance!**

We utilized our large stock of seasoned grenadilla wood on all related repairs

*We appreciate your business and the opportunity to be of continuing service to you. We take pride in our work and strive to restore your instruments to factory specification to the greatest extent possible.*
